NETZSCH Pumps One Day Seminar

Advanced Technologies To Convey Complex Fluids

Who Should Attend?

This seminar is designed for operators, maintenance professionals, and engineers associated with the design selection, operation, installation and maintenance of positive displacement pumps in industrial facilities. Whether the application is oil & gas, food & beverage, chemical processing, mining or wastewater treatment, this course will provide information regarding positive displacement pump technology and applications that will benefit you.

Presented by

The content is presented by the Product Management experts team of NETZSCH Pumps & Systems. We are the leading global provider of positive displacement pump systems ranging from progressing cavity pumps, rotary lobe pumps, peristaltic pumps, and multiple screw pumps. Presenters will share their knowledge and application guidelines.

What we will cover

The course will provide an overview of positive displacement pump technology and use in process industries. We will discuss the theory and design of positive displacement pumps, mechanical features of these pumps, applications, and benefits of the technology. We will review sizing and design parameters. Discussion will include troubleshooting

and common application issues. General maintenance on each of the pump technologies will be reviewed. With hands on demonstrations as well.

Why Should you Attend?

You will learn about the latest positive displacement pump technologies at NETZSCH Pumps for transferring the most challenging complex fluids in process industries. See how products with solids, abrasives, hazardous chemicals, high viscosities and gases can be easily conveyed at your facility.

Investment

The cost of the course will be \$325.00 for this one-day seminar. Training course materials, product documents, refreshments, and lunch will be included.

Pump Seminar Details

Date: Wednesday, 2/26/2025
Time: 8:00 am – 4:30pm
Location: NETZSCH Pumps USA – Houston
1511 FM 1960 Road
Houston, TX 77073

Class size is limited. Register early to guarantee a space. Registration deadline is 2/19/25
